

Early Childhood Outcomes Self-Assessment: ECO Process and Practice

		Not Yet	Partly	Mostly	Fully	Planning
	INFRASTRUCTURE SUPPORTS EFFECTIVE OUTCOMES DATA COLLECTION.					
1.	There are structures (e.g., support for engaging families, space, sufficient resources) in place to ensure the collection of quality early childhood (ECOs) outcomes data.					
2.	Processes are in place to facilitate efficient and complete ECO data collection.					
3.	Infrastructure supports time for teaming and collaboration around ECO data collection.					
4.	Infrastructure supports time for training, continuing education, and feedback on ECO data collection content and skills.					
5.	Ongoing support and technical assistance for implementing ECO data collection are readily available; problems are addressed in a timely fashion.					
6.	Routine supervision, monitoring, and coaching practices are in place to provide feedback and improve ECO data collection performance.
