*Short term assets refer to assets that are held for a year or less, and accountants use the term "current" to refer to an asset expected to be converted into cash in the next year or liability coming due in the next year

**Long-term assets (also called fixed or capital assets) are those a business can expect to use, replace and/or convert to cash beyond the normal operating cycle of at least 12 months.

***Monthly liabilities are the month to month obligations such as: Utilities, Contractual Obligations, Rent

Long-term liabilities are financial obligations of a company that are due more than one year in the future.

^A short-term liability is a financial obligation that is to be paid within one year. This will include TRS 19-20 obligation and back payments to OMES
